01

OVERVIEW

Executive summary

Identity, a unit of Islamic Information Centre (IIC), helps citizens keep their government-issued documents valid and correct. This report proposes the **Identity Web App** — a mobile-first, multilingual platform where any citizen can check the health of their documents, learn exactly how to fix a problem, and get assisted help from trained Identity volunteers.

The problem

Millions of citizens hold documents that disagree with each other — a misspelt name, a wrong date of birth, an old address, an unlinked mobile number. These small errors block bank KYC, scholarships, pensions, subsidies and voting. Rules change often, official portals are hard for many to use, and unofficial agents overcharge.

The solution

A free web app with a **Document Health Check**, a **Mismatch Detector**, step-by-step correction guides, appointment booking and case tracking — backed by Identity's help desk and community camps. It links only to official portals and never handles citizens' OTPs or passwords.

The outcome

Citizens fix problems faster, cheaper and with dignity. Identity serves many more people with the same team. The community gets a trusted, always-current reference for document services, and donors see measurable impact.

What the platform does, in one line each

- **Checks** — a 3-minute guided check scores a citizen's document health.
- **Compares** — flags mismatched name, DOB, gender, address and mobile across documents.
- **Guides** — plain-language checklists with official links, forms and fees.
- **Assists** — book a help-desk slot, a doorstep visit or a camp token.
- **Tracks** — every request gets a case ID, a timeline and WhatsApp updates.
- **Reminds** — alerts before expiries and mandatory updates for the whole family.

RECOMMENDATION

Approve Phase 0–1 (Discovery + MVP) at an indicative budget of ₹7.3 lakh, with a 12-week path to a pilot at the IIC help desk and public launch in month 4. Phases 2 and 3 are approved separately after the pilot review.

02

CONTEXT

Background & problem statement

About Identity

Identity is the unit of Islamic Information Centre that handles the social side of government-issued documents for citizens of India — PAN, Aadhaar, Voter ID and other essential records. It helps citizens keep these documents valid and correct, and offers correction support for every type of document, open to all citizens.

How help is delivered today

Support happens in person — walk-ins, phone calls and community camps. The model is trusted, but it does not scale: every question (*Which document do I need? What is the fee? Where do I go?*) is answered one person at a time, case status lives on paper or in chat threads, and there is no single record of the impact Identity creates.

WHY NOW

- **Aadhaar** — free online document (POI/POA) update on myAadhaar is extended to **14 June 2027**: a window to drive updates at scale.
- **PAN** — new correction forms **PAN CR-01 / CR-02** apply from 1 April 2026, via Protean and UTIITSL.
- **Voter ID** — Karnataka's Special Intensive Revision of electoral rolls began 30 June 2026, covering about 5.54 crore electors; demand for Form 6 / Form 8 help is high.
- **Data protection** — the DPDP Rules 2025 were notified on 13 Nov 2025; building privacy-first now avoids costly rework.

Six problems citizens face

Mismatched details

Name spelling, DOB, gender or address differ between Aadhaar, PAN, Voter ID and certificates.

Rules keep changing

New forms, revised fees and roll revisions mean people act on outdated advice.

Digital barriers

OTP-based portals, English-heavy screens and no mobile linked to Aadhaar shut many out.

Middlemen & scams

Unofficial agents overcharge; fake "update" links and OTP fraud target the vulnerable.

Lost time & wages

Repeat visits, unclear checklists and rejected applications cost workers days of income.

No visibility

Citizens can't track progress; Identity can't measure demand, turnaround or outcomes.

Problem statement. Citizens — especially the elderly, women, students, daily-wage and migrant workers — lose access to rights and services because of small, fixable errors in their documents, and lack a trusted, simple, multilingual place to find out what is wrong and how to fix it.

03

USERS & IMPACT

Who it serves & where the impact is biggest

The app is open to every citizen. It is designed first for the people most likely to be left behind by purely online systems.

FS

Fatima, 34
Homemaker

Surname changed after marriage; PAN still shows her maiden name, so bank KYC fails.

Needs one name-change path across documents

RK

Ravi, 52
Auto driver

Aadhaar shows only his year of birth; insurance and pension records don't match.

Needs a DOB checklist and an evening slot

AS

Ayesha, 17
PU student

Her name is spelt differently on the marks card and Aadhaar; scholarship flagged.

Needs a fix before the deadline, in her language

HY

Haji Yusuf, 68
Retired

No mobile linked to Aadhaar; can't complete OTP steps; unsure of voter-roll status.

Needs assisted or doorstep help

SN

Suresh, 29
Migrant worker

Moved to Bengaluru; the address on every document is now out of date.

Needs one address-change bundle

Impact hotspots

COMMON PROBLEM	WHAT IT BLOCKS	HOW THE APP HELPS
Name spelling & transliteration Mohammed / Mohd. / Muhammad; initials vs full name	Bank KYC, PAN–Aadhaar linking, scholarships, subsidies	Mismatch Detector + guided correction to align every document with Aadhaar
DOB mismatch or year-only DOB	Pension, insurance, exams, passport	DOB evidence checklist (birth certificate, SSLC marks card) and correct forms
Mobile not linked to Aadhaar	OTPs — and with them, almost every online service	Nearest Aadhaar centre, slot booking and reminder
Aadhaar documents not updated in 10+ years	Identity and address verification	Guide to the free myAadhaar document update (until 14 June 2027)
Address change after moving	Voter roll, ration, bank and delivery issues	Address-change bundle: Aadhaar first, then Voter ID (Form 8) and others
Electoral roll inclusion & corrections	The right to vote during roll revisions	Roll-check guidance, Form 6 / Form 8 help, BLO contact information
Child biometric updates (age 5 & 15)	School admissions, scholarships	Family reminders and centre booking

04

SCOPE

Service scope — documents covered

Phase 1 focuses on the three documents behind most everyday failures. Later phases add state and life-event documents. The app guides and assists — applications are always filed on official channels.

PHASE 1 Launch documents

Fees as of October 2026 — re-verify before quoting

DOCUMENT	AUTHORITY & OFFICIAL CHANNEL	COMMON CORRECTIONS	OFFICIAL FEE / FORM
Aadhaar	UIDAI · myAadhaar portal; Aadhaar enrolment & update centres	Name, DOB, gender, address, mobile, email, photo & biometrics; 10-year document update	Online POI/POA document update free until 14 Jun 2027 · Demographic update at a centre ₹75 · Biometric update ₹125
PAN	Income Tax Department · Protean eGov & UTIITSL (online or PAN centres)	Name, DOB, father's name, photo/signature, address; reprint	Form PAN CR-01 (individuals) / CR-02 (others), from 1 Apr 2026 · about ₹101–107 with a physical card; less for e-PAN only
Voter ID (EPIC)	Election Commission of India · Voters' Service Portal, ECINET app, Booth Level Officer	Form 8 — correction, shifting, replacement EPIC · Form 6 — new voter	Free

PHASE 2 Months 4–6

- **Ration card** — Karnataka Food & Civil Supplies Department
- **Birth & death certificates** — local registrar / Civil Registration System
- **Income, caste & residence certificates** — Nadakacheri / Seva Sindhu
- **Passport** — Passport Seva (guidance and checklists)
- **Driving licence** — Parivahan Sarathi

PHASE 3 Months 7–12

- **Scholarship document readiness** — NSP and Karnataka SSP
- **e-Shram card** for unorganised workers
- **Ayushman Bharat (PM-JAY)** card guidance
- **UDID** disability card guidance
- **Senior-citizen & pension** document checks

Four ways Identity delivers help

Self-serve

Guides, checklists and official links — any time, on any phone.

Assisted

A volunteer helps at the desk or on a WhatsApp video call.

Doorstep

Home visits for the elderly, people with disabilities and the bedridden.

Camps

Community document drives at masjids, colleges and neighbourhoods.

05

PRODUCT PLAN

What we will build — 15 modules in three apps

Three apps share one secure back end: citizens use the public app, the Identity team works from the console, and IIC leadership manages content and sees impact.

P1 MVP launch **P2** Months 4–6 **P3** Months 7–12

Citizen app · PUBLIC, MOBILE-FIRST WEB APP (PWA)

P1

Health Check

3-minute guided check that scores document health and lists issues.

P1

Mismatch Detector

Compares name, DOB, gender, address and mobile across documents.

P1

Smart Guides

Step-by-step fixes with documents, fees, forms and official links.

P1

Request Help

Open a case, upload securely, get a case ID and WhatsApp updates.

P1

Book Appointment

Help-desk slots, doorstep visits and camp tokens with QR codes.

P2

Reminders

Alerts for expiries, 10-year Aadhaar refresh, child biometrics at 5 & 15.

P2

Family Profile

Track up to 8 family members' document status — metadata only.

P1

Hub & Scam Alerts

Explainers, short videos and fraud warnings in four languages.

Staff & volunteer console · FOR THE IDENTITY TEAM

P1

Case Queue & SLA

Prioritised queue (elderly, disability, deadlines), assignment, timers.

P1

Filing Assistant

Portal-by-portal scripts; the citizen always enters their own OTP.

P2

Camp Manager

Events, registrations, on-site intake and token display.

P2

Volunteer Hub

Onboarding, training modules, certification and rosters.

Admin & insights · FOR IIC LEADERSHIP

P1

Content Manager

Versioned rules, fees and forms, each with a "last verified" date.

P2

Impact Dashboard

Cases by type, area and turnaround; donor-ready reports.

P1

Access & Audit

Roles, 2FA, audit trail and automatic data-deletion jobs.

MVP = 10 modules

Everything tagged P1 ships for the week-12 pilot; P2–P3 follow once usage data is in.

06

EXPERIENCE

How it works — journey & signature features

Mismatch Detector — worked example

FIELD	AADHAAR	PAN	VOTER ID	RESULT
Name	Mohammed Irfan	Mohd. Irfan	Mohammed Irfan	❗ PAN
DOB	12-06-1990	12-06-1990	01-01-1990	❗ EPIC
Gender	Male	—	Male	✓ OK
Address	Shivajinagar	—	Shivajinagar	✓ OK
Mobile link	No	—	—	🔧 Fix

Illustrative data. The Health Check runs in the citizen's browser — nothing is stored unless they choose to open a case.

Action plan generated

Health score 58 → 100 once all three are done

- 1 Link mobile to Aadhaar**
Nearest Aadhaar centre · ₹75 · book a slot in-app
- 2 Correct PAN name to match Aadhaar**
Form PAN CR-01 via Protean / UTIITSL
- 3 Correct DOB on Voter ID**
Form 8 on the Voters' Service Portal · free

[Book assisted help](#)

Assisted mode

Every flow has a "do it with a volunteer" path — at the desk or on WhatsApp video. The citizen keeps control of OTPs and payments.

Smart reminders

Knows document rules — 10-year Aadhaar refresh, child biometrics at 5 and 15, passport and licence expiry.

Official links only

Every guide links to the government portal, shows a "last verified" date, and says fees go only to the authority.

Moments of high demand — where the app helps most

School & college admissions

Birth certificate, Aadhaar name and DOB must agree with school records.

Scholarship windows

NSP / SSP need matching names across Aadhaar, bank and marks cards.

Tax-filing season

PAN–Aadhaar linking fails when name or DOB differ.

Electoral roll revisions

Inclusion, corrections and shifting through Form 6 and Form 8.

Marriage & relocation

Name and address updates across every document, in the right order.

Senior-citizen needs

Pension, life certificates and mobile linking for OTPs.

07

DESIGN SYSTEM

Urbanist UI — design language

Modern, calm and trustworthy. Emerald signals trust and continuity with IIC; deep ink gives authority; amber and coral are reserved strictly for status, so citizens see at a glance what needs attention.

Colour palette

INK 900 #0F1B2D Text, dark surfaces	EMERALD 600 #0E7C66 Brand, primary actions	MINT 300 #6EE7C8 Highlights on dark	EMERALD 50 #E7F5F1 Tinted surfaces	MIST 50 #F5F7F6 App background
AMBER 400 #F5A524 Status: update due	CORAL 500 #E5484D Status: mismatch, error	SKY 500 #2F6FED Info, in progress, links	SLATE 500 #5B6B7A Secondary text	LINE 200 #DCE3E1 Borders, dividers

Aa

Urbanist

Open-source geometric sans (SIL OFL), variable 100–900. Paired with Noto Sans Kannada, Noto Sans Devanagari and Noto Naskh Arabic.

Display / H1

32 / 800

Heading / H2

Start Health Check

Book help desk

NAME AS ON AADHAAR

Fatima Shaikh

PAN card

Name differs from Aadhaar

⚠️ Mismatch

UX principles

Mobile-first & light

Fast on budget phones and patchy networks; guides work offline.

Plain language, 4 languages

Short sentences, icons with labels, full RTL layout for Urdu.

Accessible by default

WCAG 2.2 AA contrast, 48 px touch targets, large-text mode.

Assisted everywhere

Any flow can be completed with a volunteer alongside.

Visible trust cues

Official-link badges, "last verified" dates, OTP warnings.

One next step

Every screen ends with a single, clear primary action.

07

DESIGN SYSTEM

Screen concepts

Key screens from the citizen app and the staff console, in the Urbanist UI style. Final layouts will be refined with real users during Phase 0.

Home & Health Score
All documents, one glance

Mismatch report
Plain-language action plan

Case tracker
Transparent, step by step

Staff console — case queue

Priorities, SLA timers and assignment in one view; citizen names are masked by default.

4 languages · mirrored layout for اردو

Installable · guides work offline

Large-text mode · one tap

08

TECHNOLOGY

Technology architecture

A lean, proven stack that a small team can build and maintain, hosted in India, with security and privacy designed in from the first line of code.

Recommended stack

LAYER	CHOICE	WHY
Front end	Next.js (React) + TypeScript, Tailwind CSS with Urbanist tokens, PWA	Fast, search-friendly guides; offline caching; one codebase for citizens and staff
Back end	Node.js — Next.js API routes; NestJS if services grow	One language across the stack; easy to hire and hand over
Database	PostgreSQL (managed) + Prisma ORM	Reliable relational case data; row-level access control
Files	S3-compatible storage, AES-256 at rest, short-lived signed URLs	Documents are never public; automatic deletion policies
Messaging	WhatsApp Business Platform; DLT-registered SMS	Reaches citizens where they already are; compliant delivery
Hosting	India-region cloud, CDN, daily encrypted backups	Data residency, low latency, quick recovery
Quality	Automated tests, error tracking, uptime monitor, privacy-friendly analytics	Catch issues early — and no advertising trackers

09

TRUST

Data protection, trust & compliance

Identity handles some of the most sensitive data a citizen has. Trust is the product — so the app collects as little as possible, keeps it for as short a time as possible, and is transparent about both.

Facilitation, not impersonation

Identity is not a government agency. The app says so on every page, links only to official portals, and citizens pay official fees directly to the authority.

No OTPs, PINs or passwords

Identity never asks for or stores credentials for government portals. During assisted filing, the citizen enters their own OTP.

Masked Aadhaar only

Full Aadhaar numbers are never stored — only the last four digits. Citizens are encouraged to share masked Aadhaar, in line with UIDAI guidance.

DPDP-ready by design

Clear consent notices in the citizen's language, purpose limits, easy withdrawal and erasure, and a named grievance officer — aligned with the DPDP Act 2023 and DPDP Rules 2025.

Security controls

Role-based access, 2FA for staff, an audit log on every document view, India-region hosting, and a security test (VAPT) before launch and every year.

Breach readiness

A written incident plan: affected citizens and the Data Protection Board are informed promptly, with a detailed report within 72 hours.

Data lifecycle

01 · COLLECT

Only with consent

Health Check runs in the browser; data is saved only when a case is opened.

02 · USE

Only for the case

Visible only to the assigned volunteer and their supervisor.

03 · PROTECT

Encrypted, logged

AES-256 at rest, TLS in transit, every access recorded.

04 · DELETE

Automatically

Uploaded documents purged 30 days after case closure; case records anonymised after 12 months.

Volunteer code of conduct

- Identity verification and a signed confidentiality undertaking
- Training and certification before any access to case data
- No personal phones for document photos — in-app upload only
- Access removed on the day a volunteer leaves

DISCLAIMER SHOWN IN THE APP

"Identity is a community help service of Islamic Information Centre. We are not a government office. All applications are submitted on official government portals, and fees are paid only to the issuing authority. We will never ask for your OTP, PIN or password."

The DPDP Rules 2025 were notified on 13 November 2025 and phase in over 18 months; most data-fiduciary obligations apply from around May 2027. A legal review is recommended before launch.

10

DELIVERY

Implementation roadmap

A 12-month plan in four stages, assuming approval and a start in November 2026. Each stage ends with a review before the next is funded.

◆ **Milestones:** design sign-off (wk 3) · pilot starts (wk 12) · public launch (month 4) · Phase-2 release & DPDP readiness check (month 7) · year-1 review (month 12)

PHASE 0 Discovery & design

- Workshops with Identity staff and volunteers
- Review 6 months of help-desk queries (anonymised)
- Wireframes, Urbanist UI kit, content plan

PHASE 1 MVP build

- All 10 PI modules for Aadhaar, PAN and Voter ID
- Guides in English, Kannada, Hindi and Urdu
- Security test and fixes before the pilot

PILOT Help desk + 1 camp

- About 200 citizens served with the app
- Measure time saved, errors, satisfaction
- Fix, polish, then public launch

PHASE 2-3 Grow & scale

- New documents, reminders, family profiles, camps
- Partner centres at masjids, colleges and NGOs
- Impact dashboard; explore DigiLocker integration

Governance & reporting

Weekly

Stand-up: product owner + build team.

Fortnightly

Live demo to the Identity team.

Monthly

Progress, spend & risk note to IIC.

Stage gate

Go / no-go review after each phase.

RESOURCES

11

Team & indicative budget

Project team

ROLE	WHO	COMMITMENT
Product owner	Identity coordinator (IIC)	30–40% throughout; final say on scope
UI/UX designer	Contract	Phase 0–1, then on call
Full-stack developers (2)	Contract or in-house	Phase 1–2; one part-time after launch
QA & security tester	Contract	Part-time, before each release; annual VAPT
Content & translation	Volunteers + one reviewer per language	Ongoing; monthly fee & rule checks
Privacy & grievance officer	Designated IIC staff member	Ongoing; consent, requests, incidents
Field coordinators & volunteers	Identity team	Help desk, camps, assisted mode

Indicative budget (INR · Bengaluru market rates, Oct 2026)

A · PHASE 0–1 (ONE-TIME)	₹
Discovery, UX research & UI design	1,20,000
Web app development (2 developers, ~3 months)	4,20,000
Guides & checklists in 4 languages	60,000
QA, accessibility & security testing	60,000
Set-up: domain, cloud, WhatsApp, SMS (DLT)	25,000
Help-desk kit: 2 tablets + document scanner	45,000
Total A	7,30,000

B · PHASE 2 (ONE-TIME)	₹
Development: reminders, family, camps, volunteer hub, dashboard	3,00,000
Phase-2 document guides & translations	40,000
Usability testing with citizens & volunteers	30,000
Total B	3,70,000

C · RUNNING COST (PER YEAR)	₹
Cloud hosting, database & encrypted storage	84,000
WhatsApp & SMS notifications	60,000
Maintenance & support (part-time developer)	2,40,000
Annual security audit & privacy review	50,000
Domain, email, tools & licences	16,000
Total C	4,50,000

FIRST-YEAR OUTLAY (A + B + C)

₹15.5 lakh

Upper bound — running costs only start at launch, so the actual year-1 figure will be lower.

Funding approach

Donor and CSR sponsorship plus community contributions. The app is free for citizens; whether to charge a nominal fee for assisted filing is a decision for IIC (see section 13).

Estimates exclude salaries of existing IIC staff and volunteers, and should be firmed up with at least two vendor quotes during Phase 0.

12

MEASUREMENT

KPIs, risks & mitigation

Year-1 targets (to be confirmed after the pilot)

15,000

Document Health Checks completed

4,000

correction cases resolved

≤ 3 days

from request to application filed (working days)

24

community document camps

150

trained and certified volunteers

≥ 4.5/5

citizen satisfaction rating

100%

uploaded documents deleted on schedule

0

personal-data breaches

Risk register

RISK	LIKELIHOOD	IMPACT	MITIGATION
Rules, forms or fees change	High	Medium	CMS with a "last verified" date on every guide; one owner per document; monthly review.
Personal-data breach	Low	High	Collect minimum data, encrypt, auto-delete, 2FA, audit logs, VAPT, 72-hour incident plan.
Brand misuse or confusion with a government office	Medium	High	Disclaimers on every page, verified volunteer IDs, official links only, scam alerts.
Low digital literacy / no smartphone	High	Medium	Assisted mode, WhatsApp-first updates, help desk, doorstep visits and camps.
Volunteer turnover or uneven quality	Medium	Medium	Training and certification, step scripts in the Filing Assistant, supervisor review of cases.
Official portal downtime or delays	Medium	Low	Show the authority's stage separately; set clear expectations; escalation guidance.
Funding gaps after launch	Medium	High	Lean stack, stage-gated funding, impact dashboard and CSR-ready reports.

How we measure. Case records and appointment logs feed the Impact Dashboard automatically; a two-question WhatsApp survey closes every case; volunteers log help-desk walk-ins in the console. No individual citizen data is used in reports — only counts and averages.

Review rhythm. KPIs are reviewed monthly by the product owner and quarterly by IIC leadership. Targets are reset after the pilot, once real demand and turnaround times are known.

13

THE ASK

Decisions & next steps

Decisions needed from IIC

#	DECISION
1	Approve Phase 0–1 scope (Aadhaar, PAN, Voter ID) and the ₹7.3 lakh indicative budget
2	Appoint a product owner and a privacy & grievance officer
3	Confirm pilot location(s) and help-desk hours
4	Decide fee policy: fully free, or a nominal charge for assisted filing
5	Choose the web address and confirm the "Identity" name and mark
6	Agree the funding route — donors, CSR, or community contributions

First 30 days after approval

- ☐ Stakeholder workshop with the Identity team
- ☐ Collect anonymised samples of common help-desk cases
- ☐ Get at least two developer / agency quotes
- ☐ Inventory current guides, forms and fees per document
- ☐ Wireframes of the 5 key screens for review
- ☐ Register domain; start WhatsApp and SMS (DLT) onboarding

Valid. Correct. Yours.

With approval, Identity can pilot the web app at the IIC help desk in about 12 weeks — and turn one-to-one help into a service every citizen can reach.

REFERENCES (ACCESSED OCTOBER 2026)

1. UIDAI office memorandum (13 May 2026) extending free online Aadhaar document update to 14 June 2027; centre fees ₹75 / ₹125 — reported by Outlook Money, 20 May 2026.
